

TRANSPORT IN DIFFICULT  
WEATHER CONDITIONS

EXPRESS  
LOADS

DANGEROUS  
MATERIALS

There are many  
transport companies  
on the market.  
Why do you need us?  
For **4** reasons:

## 1 Huge experience

We have been on the demanding market of transport and spedition services since 1998. Over that period we have managed to build a reliable company based on solid principles offering high standard services at competitive prices.

## 2 Modern and extensive fleet

Our modern fleet comprises 90 specialised vehicles including 22 three-axle tractors and refrigerated trailers as well as side open refrigerated vehicles and curtain side trailers. The fleet is constantly being upgraded. All the vehicles are equipped in GPS navigation and most of them meet Euro 5 and Euro 6 standards.

## 3 Strong team

We are very selective about who can join our Elltrans team. We go for highly-qualified people, personality traits such as reliability and determination to do the tasks and meet our clients' expectations are also fundamentally important. All our drivers are not only highly skilled and qualified for the job, but, above all, experienced.

## 4 High work standards

We do realise how important it is for our clients to be updated on what is happening with their load. That is why we invite you to contact us 24/7. We take care to comply with all regulations and standards. We have all necessary documents: the Carrier's and Freight Forwarder's Liability Insurance for both domestic carriage of goods and international traffic,

as well as Liability Insurance for the carriage of goods in Germany. We are constantly improving the quality of our services. We received TRANS TCC certificate and we implemented and applies the quality management system conformable with the requirements of the standard PN-EN ISO 9001:2009. Currently, we introduce to HACCP implementation.

### What makes our offer special?

- transport and spedition services supporting goods circulation in Poland and other countries of Central and Western Europe
- transportation of waste and dangerous materials (ADR) – we are authorized to transport such materials over Sweden, Denmark, Germany and the Netherlands
- three-axle tractors suitable for difficult winter conditions of Scandinavia so that we can guarantee your load will reach its destination on time
- transportation of express loads in a double-crew system, which shortens the time of mandatory rest breaks

Do you need our services? Do you have any questions? Contact us!
